SPECIFICATIONS FOR POWER LINE CLEARANCE (TREE TRIMMING) SERVICE**

A. GENERAL

These specifications cover the cutting and removal of live limb and dead wood in trees to provide suitable electrical clearance between trees and the overhead lines, apparatus or structures, together with the removal of all dead, broken and damaged limbs within the public and private ways. Line clearing shall follow the best recognized and accepted forestry and arboricultural standards, including ANSI A300 and Z133.1 standards, and must comply with all federal, municipal and state laws in force.

All line clearance work shall be performed in and around the immediate vicinity of energized high voltage electric wires.

For the purposes of performing work under these specifications, the Peabody Municipal Light Plant service area will be divided into three (3) approximately equal sections. All hours worked during a scheduled work day M-F (7:30 am to 4:00 pm) with the regular crew will be paid at the contracted daily rate regardless of weather conditions or nature of work (i.e. storm work).

The Contractor shall also have available (in addition to the normally assigned crew), under the terms of this Contract, additional personnel and equipment to respond to special requests such as clearance for new construction, unusual growth areas, standby, working storms or other catastrophic events. The Contractor shall provide off hour contact information and be available to respond to off hour emergencies. The Contractor will be expected to respond to PMLP within one (1) hour of being called. PMLP shall be given first right of refusal for up to six (6) additional local crews (i.e. crews normally assigned to other regional utilities) for major storm preparation prior to them being released to work for other utilities.

All Contractors bidding on this proposal are required to have at least three (3) years' experience in the region performing Line Clearance work.

Limbs which interfere with linemen climbing a pole shall be removed. A clear climbing space of at least 30 inches (30") square shall be provided at poles.

DAILY SCHEDULE

- A. Hours of work shall be 7:30 A.M. to 4:00 P.M.

LOST TIME

The Peabody Municipal Light Plant will pay the Contractor, under the terms of this Contract, only for actual hours worked. Peabody Municipal Light Plant will not reimburse Contractor for any hours lost due to inclement weather, holidays, equipment failure, etc. The Contractor will supply the types of work that may be performed during inclement weather

CLEARANCE

All overhead primary lines shall be pruned to provide a minimum of six (6) feet of overhead clearance from the outermost phase, a minimum of six (6) feet of side clearance from the outermost phase and a minimum of eight (8) feet of clearance below the wires.

All secondary wire (triplex and open wire) shall be pruned to provide a minimum of three (3) feet of clearance from wire to vegetation. All service wires on the circuit shall be inspected during the pruning process. For branches that are making contact with the service wire, the contractor shall do whatever pruning is necessary to correct that situation. The entire service drop need not be pruned, only the point of contact.

The contractor shall recognize that the use of ANSI A300 standards and techniques will result in clearances beyond the dimensions noted above.

- A. The main trunk of the tree or major leads which are structurally sound and healthy may be left growing within these distances. These situations must be approved by the PMLP Asst. Superintendent of Distribution, Safety Support, or his designee. Any smaller growth should be removed or redirected.
- B. Where greater clearances have been achieved in previous cycles, the pruning shall be completed so as to re-establish the clearances in a manner that equals or exceeds the previous clearance conditions.
- C. The contractor shall ground cut any new volunteer growth capable of growing into the wires from around poles, guys, fences, etc. within the maintained yard areas after notifying and receiving the approval of the property owner
- D. It is an objective of the program to continually strive to reduce the number of under-wire tree and branch growth that will continually require pruning, by selective thinning of saplings and by removing sufficient under-wire growth on each cycle. The Contractor is expected to emphasize this type of removal whenever possible
- E. Vine Control: All vines growing on poles, guy wires, stub poles or towers shall be cut so as to create a "growth gap" of 2 feet at ground line in addition to removal of the vines within the trim zone

TYPES OF CLEARANCE

To secure the clearance objectives outlined above, line clearing shall be conducted in the following manner with respect to type of clearing.

- A. Electric Lines, 4,000 Volts and up: Dead or unsound wood within 20 feet, either side of wires or the full height of the tree above the wires, shall be removed.
- B. Electric Lines 600 Volts or Less and Armored Aerial Cables. Deadwood above these wires which is hazardous because of its weight or any other reason shall be removed. When adequate clearance to aerial cable cannot be obtained the Contractor must inform the Peabody Municipal Light Plant.

C. Street Lights: The area under each street light shall be cleared in a manner which will allow maximum light distribution onto the roadway. Refer to illustration (Table 1) attached.

CUTS

Cutting shall be done in such a manner as to protect current tree health with all possible regard for future growth and development. The following shall receive particular attention:

A. In pruning, no damage shall be done to the cambium layer. Loosening or stripping of the bark shall be avoided: Circular saws shall not be used.

B. All cuts shall be made sufficiently close to the trunk or parent limb, without cutting into the branch collar to leave a protruding stub, so that closure can readily start under normal conditions. Clean cuts shall be made at all times.

C. Climbing irons shall not be used in any tree unless the removal of the tree is certain and authorized by the Peabody Municipal Light Plant.

D. Dead wood and broken limbs greater than three inches (3") in diameter, which when broken from the trees will endanger wires, cables, apparatus or structures, shall be removed.

E. Tree Climbing or ladder use may be required for inaccessible locations or landscaped areas or driveways that may be subject to damage.

TERM OF CONTRACT

The Term of the Contract shall be Two (2) years. Either party may terminate the Contract with written notification sixty (60) days prior to the requested termination date.

PERSONNEL

The composition of the line clearing crews shall be satisfactory to the Peabody Municipal Light Plant's Representative.

A typical crew for the Plant's requirements normally would consist of a foreman and ground man using a lift and chipper with provisions on lift truck to contain chips. The foreman is required to have a minimum of five years' experience on electric utility tree trimming and it is preferred that this person be a Certified Arborist. Preference will be given to proposals where the foreman is a Certified Arborist. The type of certification the Certified Arborist holds is required to be included on the bid form. If a proposal is accepted that includes a Certified Arborist as the crew foreman, then the contractor will be required to maintain a Certified Arborist as the crew foreman for the term of the contract, unless mutually agreed otherwise.

The Contractor's representative in charge of each crew shall be capable of satisfactorily supervising all work performed. Any additional supervision provided by the Contractor shall be at no charge to the Peabody Municipal Light Plant. When applicable, the contractor shall obtain permission from property owners, Municipal Authority or State Authority before proceeding with line clearing work. At any time PMLP may request any AVL (auto vehicle location) data if available.

Only qualified Contractor's employees shall be assigned to the actual line clearing and they shall be assisted by qualified helpers, to attend the gathering, removal and disposal of limbs and brush. All crew members will be Electric Hazard Awareness Program (EHAP) trained. Crew drivers must have approved and active Commercial Driver's Licenses. Crew members required by the Commonwealth of Massachusetts to maintain a Massachusetts Hoisting License to perform their job functions will maintain these licenses. Copies of licenses must be on file with the PMLP.

The conduct of the Contractor's employees shall be maintained at the standard required of the employees of the Peabody Municipal Light Plant.

ELECTRICAL REPAIR WORK

The Peabody Municipal Light Plant shall make all repairs to overhead lines, apparatus or structures necessary as a result of negligence on the part of the Contractor, the Contractor's agent, or the Contractor's employees. Such line work is to be done at the expense of the Contractor.

DAMAGE TO PRIVATE PROPERTY

The Contractor shall replace or make necessary repairs to all property destroyed or damaged in the course of the work and exercise due care and diligence in adequately protecting all properties, both real and personal, from damage of whatsoever nature whenever crossed over, on, or in the vicinity of the work. If the contractor neglects or fails to promptly make said repairs or make good of said destruction, Peabody Municipal Light Plant may make any and all necessary repairs to the satisfaction of the property owner and the Contractor agrees to promptly reimburse Peabody Municipal Light Plant the amount of its incurred cost and expenses.

PUBLIC RELATIONS

It is important that good public relations be maintained by the Contractor. All work shall be planned to avoid outages to electric customers; contact the Peabody Municipal Light Plant's Superintendent of Distribution or his Designee in the event an outage is necessary.

When obtaining permission to trim trees from private property owners, Municipal Authorities or State Authorities; the Contractor must do so in a manner which enhances Public Relations for the Peabody Municipal Light Plant.

Arrangements for the first meeting between the Contractor and Municipal or State Authorities will be made by the Peabody Municipal Light Plant's Superintendent of Distribution or his Designee.

PRIVATE PROPERTY PERMISSIONS

Verbal permission to trim private property trees shall be obtained in advance from the owner by the Contractor's Supervisor. A witness to the permission is desirable. If permission by private owner(s) is not obtained or is denied, the contractor will provide PMLP written notification of lack of obtaining or denial of permission within 48 hours.

ELECTRICAL INFORMATION

All information concerning types of circuits, wires, cables or apparatus on streets shall be obtained from the Peabody Municipal Light Plant's Superintendent of Distribution or his designee.

WORK METHODS

The Contractor shall take the necessary precautions to prevent personal injury or damage to property and shall conduct operations with a minimum of interference to traffic or inconvenience to the public. A concerted effort must be maintained in order that there will be no unnecessary blocking of public streets.

POLICE ASSISTANCE

If in order to perform line clearing work traffic conditions warrant assistance from police, all costs associated with such assistance shall be borne by the PMLP.

LINE DEFECTS

The contractor's representative in charge of a crew is expected to report to the Peabody Municipal Light Plant's Superintendent of Distribution or his designee all defects on the lines which they may notice during the process of their work. They are requested especially to notice and report all cases of wear in tree guards, or need for additional tree wire or guards.

NOTIFICATIONS

Before the start of each day's work, the tree crew(s) or a company representative will report to the PMLP's Superintendent of Distribution or his Designee. This is subject to change at the discretion of the Superintendent of Distribution or his Designee.

The actual work performed, work location, size of the crew, and changes in plans shall be reported daily (in writing) to the Superintendent of Distribution or his designee. Job Location: Peabody

Information about Prevailing Wage Schedules for Awarding Authorities and Contractors

- This wage schedule applies only to the specific project referenced at the top of this page and uniquely identified by the "Wage Request Number" on all pages of this schedule.
- An Awarding Authority must request an updated wage schedule from the Department of Labor Standards ("DLS") if it has not opened bids or selected a contractor within 90 days of the date of issuance of the wage schedule. For CM AT RISK projects (bid pursuant to G.L. c.149A), the earlier of: (a) the execution date of the GMP Amendment, or (b) the bid for the first construction scope of work must be within 90-days of the wage schedule issuance date.
- The wage schedule shall be incorporated in any advertisement or call for bids for the project as required by M.G.L. c. 149, § 27. The wage schedule shall be made a part of the contract awarded for the project. The wage schedule must be posted in a conspicuous place at the work site for the life of the project in accordance with M.G.L. c. 149 § 27. The wages listed on the wage schedule must be paid to employees performing construction work on the project whether they are employed by the prime contractor, a filed sub-bidder, or any sub-contractor.
- All apprentices working on the project are required to be registered with the Massachusetts Department of Labor Standards, Division of Apprentice Standards (DLS/DAS). Apprentice must keep his/her apprentice identification card on his/her person during all work hours on the project. An apprentice registered with DAS may be paid the lower apprentice wage rate at the applicable step as provided on the prevailing wage schedule. **Any apprentice not registered with DLS/DAS regardless of whether or not they are registered with any other federal, state, local, or private agency must be paid the journeyworker's rate for the trade.**
- The wage rates will remain in effect for the duration of the project, except in the case of multi-year public construction projects. For construction projects lasting longer than one year, awarding authorities must request an updated wage schedule. Awarding authorities are required to request these updates no later than two weeks before the anniversary of the date the contract was executed by the awarding authority and the general contractor. For multi-year CM AT RISK projects, awarding authority must request an annual update no later than two weeks before the anniversary date, determined as the earlier of: (a) the execution date of the GMP Amendment, or (b) the execution date of the first amendment to permit procurement of construction services. Contractors are required to obtain the wage schedules from awarding authorities, and to pay no less than these rates to covered workers. The annual update requirement is not applicable to 27F "rental of equipment" contracts.
- Every contractor or subcontractor which performs construction work on the project is required to submit weekly payroll reports and a Statement of Compliance directly to the awarding authority by mail or email and keep them on file for three years. Each weekly payroll report must contain: the employee's name, address, occupational classification, hours worked, and wages paid. Do not submit weekly payroll reports to DLS. A sample of a payroll reporting form may be obtained at <http://www.mass.gov/dols/pw>.
- Contractors with questions about the wage rates or classifications included on the wage schedule have an affirmative obligation to inquire with DLS at (617) 626-6953.
- Employees not receiving the prevailing wage rate set forth on the wage schedule may report the violation to the Fair Labor Division of the office of the Attorney General at (617) 727-3465.

Information about Prevailing Wage Schedules for Awarding Authorities and Contractors

- This wage schedule applies only to the specific project referenced at the top of this page and uniquely identified by the "Wage Request Number" on all pages of this schedule.
- An Awarding Authority must request an updated wage schedule from the Department of Labor Standards ("DLS") if it has not opened bids or selected a contractor within 90 days of the date of issuance of the wage schedule. For CM AT RISK projects (bid pursuant to G.L. c.149A), the earlier of: (a) the execution date of the GMP Amendment, or (b) the bid for the first construction scope of work must be within 90-days of the wage schedule issuance date.
- The wage schedule shall be incorporated in any advertisement or call for bids for the project as required by M.G.L. c. 149, § 27. The wage schedule shall be made a part of the contract awarded for the project. The wage schedule must be posted in a conspicuous place at the work site for the life of the project in accordance with M.G.L. c. 149 § 27. The wages listed on the wage schedule must be paid to employees performing construction work on the project whether they are employed by the prime contractor, a filed sub-bidder, or any sub-contractor.
- All apprentices working on the project are required to be registered with the Massachusetts Department of Labor Standards, Division of Apprentice Standards (DLS/DAS). Apprentice must keep his/her apprentice identification card on his/her person during all work hours on the project. An apprentice registered with DAS may be paid the lower apprentice wage rate at the applicable step as provided on the prevailing wage schedule. **Any apprentice not registered with DLS/DAS regardless of whether or not they are registered with any other federal, state, local, or private agency must be paid the journeyworker's rate for the trade.**
- The wage rates will remain in effect for the duration of the project, except in the case of multi-year public construction projects. For construction projects lasting longer than one year, awarding authorities must request an updated wage schedule. Awarding authorities are required to request these updates no later than two weeks before the anniversary of the date the contract was executed by the awarding authority and the general contractor. For multi-year CM AT RISK projects, awarding authority must request an annual update no later than two weeks before the anniversary date, determined as the earlier of: (a) the execution date of the GMP Amendment, or (b) the execution date of the first amendment to permit procurement of construction services. Contractors are required to obtain the wage schedules from awarding authorities, and to pay no less than these rates to covered workers. The annual update requirement is not applicable to 27F "rental of equipment" contracts.
- Every contractor or subcontractor which performs construction work on the project is required to submit weekly payroll reports and a Statement of Compliance directly to the awarding authority by mail or email and keep them on file for three years. Each weekly payroll report must contain: the employee's name, address, occupational classification, hours worked, and wages paid. Do not submit weekly payroll reports to DLS. A sample of a payroll reporting form may be obtained at <http://www.mass.gov/dols/pw>.
- Contractors with questions about the wage rates or classifications included on the wage schedule have an affirmative obligation to inquire with DLS at (617) 626-6953.
- Employees not receiving the prevailing wage rate set forth on the wage schedule may report the violation to the Fair Labor Division of the office of the Attorney General at (617) 727-3465.
- Failure of a contractor or subcontractor to pay the prevailing wage rates listed on the wage schedule to all employees who perform construction work on the project is a violation of the law and subjects the contractor or subcontractor to civil and
