No consideration shall be given by the Purchaser to cost increases or loss of anticipated profits, due to suspension or reinstatement of this Contract.

19. FORCE MAJEURE

Background

The Peabody Municipal Light Plant (PMLP) anticipates replacing roughly 26,000 revenue meters in the City of Peabody and Town of Lynnfield during 2017. This is in conjunction with the PMLP's Advanced Metering Infrastructure (AMI) project. In light of this project, the PMLP anticipates the need for a licensed electrical contractor to repair and replace customer owned service entrance equipment that is found to be damaged and must be repaired and/or replaced in order to safely replace the PMLP meter. It is expected that during a small percentage of the aforementioned meter replacements, the customer's meter socket may be found to require immediate repairs or replacement to restore power. As a result, the PMLP is procuring an electrical contractor to perform both scheduled and unplanned (i.e. an immediate response by the contractor is required) repairs as outlined below.

Scope of Services

The Peabody Municipal Light Plant, hereinafter referred to as "PMLP", is requesting proposals from qualified, licensed electrical contractors to provide electrical contracting services. The licensed electrical contractor, hereinafter referred to as "Contractor", will be required to perform services specified herein. The Contractor will be expected to enter into a contract with the PMLP, consistent with the terms and conditions of this request for proposal.

The Contractor shall be available to respond to PMLP service calls requiring electrical repairs surrounding residential and commercial electrical services of 400 amps and less with self-contained metering. It is expected that the Contractor shall respond in a timely manner to electrical malfunctions discovered during PMLP's meter exchange project. The anticipated scope of work is expected to be, but shall not to be limited to, licensed electrical work surrounding the repair and/or replacement of a PMLP customer's electrical service entrance equipment related to damage discovered during the meter exchange process. The meter exchange work is expected to occur between the hours of 8:00am and 6:00pm, Monday through Saturday. Depending on the severity of the situation the Contractor would be required to respond to service calls during that timeframe, and remain on the job until service has been restored to the customer. Less urgent work or required follow up work related to the completion of any unplanned work, may be scheduled within 5 business days. The project is expected to start at the beginning of 2017 and continue throughout the year, the prices reflected in the bid form shall be good for that time frame.

The PMLP anticipates some of the electrical work performed under this contract shall be scheduled work; however, it is expected that the majority of the work will be unplanned work. It is expected that on average at least one (1) unplanned service repair request will arise daily, however the PMLP expects this to be unevenly distributed with the potential of several unplanned requests arising in a day. This estimate is based on a nine (9) month schedule in which the PMLP expects to exchange roughly 26,000 electrical meters. The PMLP expects the Contractor will have adequate staff to respond to several calls

within a given day with the understanding that time is of the essence and it is the PMLP's desire to maintain excellent service and reliability to its customers. With that in mind, the Contractor will be expected to respond in a timely fashion, potentially on a daily basis, to unplanned work that may arise. The PMLP expects, for unplanned work, the Contractor shall be on site to assess the repair work within one (1) hour after PMLP places the call with the Contractor. If the PMLP has determined that the Contractor has been negligent in their responses to unplanned work, the PMLP may at its discretion void the contract with the Contractor and select an alternate Contractor to assume the contract.

The Contractor will invoice the PMLP monthly for all work that has been both completed by the Contractor and signed off by the Wiring Inspector by the last business day of the month.

The Contractor shall provide pricing on the PMLP provided bid form to reflect the following scenarios:

1. COSTS ASSOCIATED WITH SINGLE PHASE SERVICES

This section applies to locations where a 60A, 100A or 200A services exists with a single meter, and an electrical failure has occurred during the removal of a meter, and one of the following has occurred:

- a) the meter socket cannot be repaired but can be replaced and the existing service entrance conductors can be reused,
- b) Or the meter socket itself cannot be replaced without performing additional work.

(Note: If work can be completed to repair the meter socket, without having to replace it (i.e. replace meter jaw), it is expected that the Contractor shall perform repairs and invoice via the "COSTS TO PERFORM WORK - OTHER" method described below.)

In these scenarios, the Contractor shall replace the service with an equivalent installation. This shall mean the following:

- a) 60A meter sockets shall be replaced with 100A meter sockets
- b) 100A meter sockets shall be replaced with 100A meter sockets
- c) 200A meter sockets shall be replaced with 200A meter sockets

The Contractor shall perform the minimum work required to replace the meter socket, while also performing whatever additional minimal work that may be required by the Wiring Inspector to meet relevant aspects of the current National Electric Code (NEC). **A per unit cost shall be provided by the Contractor for meter socket replacements as outlined on the bid sheet. These costs shall reflect the total cost to be invoiced to the PMLP including labor, materials and associated overhead needed (but excluding Permit Fees) strictly for the change out of the meter socket. A flat rate is also required for the installation of an external driven ground for those situations where a meter socket is to be replaced and there is not currently an external driven ground in place and one is required by the local Wiring Inspector. Other approved repairs, required by the Local Wiring Inspector or requested by the Superintendent of Distribution of the PMLP (or his designee) such as replacing service entrance**

conductors, shall be quoted separately as outlined below. (PERMIT FEES ARE TO BE ITEMIZED ON THE INVOICE SEPARATELY)

If the service entrance conductors require replacement, the Contractor shall replace the service entrance with an equivalent installation. For example, if service entrance conductors are installed in conduit, the replacement shall be in PVC conduit. If the service entrance conductors are bundled "SE" style cable, the replacement shall be bundled "SE" style cable installation. The Contractor shall perform the minimum work to repair the service; this includes evaluating whether the line side, load side or both require replacement to bring the service into compliance with the NEC as required by the local Wiring Inspector. **A cost per foot of service entrance cable for 100A and 200A services shall be provided by the Contractor on the bid form, this will include all the labor, materials, and overhead to remove existing service entrance conductors and install new service entrance conductors to bring the service up to the NEC as required by the Wiring Inspector for their approval.**

In many cases, an external driven ground(s) shall be required to bring the service up to the NEC. The most common upgrade shall require driving in two (2) ground rods connecting to the service as needed. In addition, an intersystem bond is also required. To this point, **a cost to install grounding provisions shall be provided by the contractor. This cost shall include all materials, labor, and overhead required to install grounding provisions as outlined above for a 100A service and a 200A service.**

A line item has been provided for both scheduled and unplanned costs where appropriate. The Contractor shall also assume any line items under the "ADDITIONAL WORK THAT MAY BE ADDED TO METER SOCKET REPLACEMENT COST ABOVE" section on the bid form, are being performed during the time of the METER SOCKET REPLACEMENT. Thus costs associated with travel time do not need to be included for these line items.

All material removed from the customer site shall be brought back to the PMLP, and shall be the property of the PMLP.

All work performed shall require Wiring Inspector approval before invoicing the PMLP.

2. COSTS TO PERFORM WORK - OTHER

For work that does not fall under section 1 above, the Contractor shall invoice the PMLP for time and materials based on the following formula, which shall be:

- **MATERIAL MARKUP COST** – The Contractor shall provide a percentage reflecting their material markup cost, if any. It is expected that the Contractor shall submit material invoices for any materials used on a specific job.
- **COST PER HOUR OF JOURNEYMEN** – The Contractor shall provide a firm total hourly cost for a Journeyman, which shall include any overhead, administrative, or associated costs.

- COST PER HOUR APPRENTICE - The Contractor shall provide a firm total hourly cost for an Apprentice, which shall include any overhead, administrative, or associated costs.
- COST PER HOUR OF VEHICLE – The Contractor shall provide a firm total hourly cost per vehicle, which shall include any associated costs related to fuel, maintenance, miles, etc.

The costs bid under this section shall include both a rate for scheduled work and for unplanned (i.e. same day) work. The PMLP shall contact the Contractor between the hours of 8:00am and 6:00pm, Monday through Saturday when an unplanned situation arises or to plan scheduled work. Awarding Authority: Peabody Municipal Lighting Commission
Contract Number: **City/Town:** PEABODY
Description of Work: PMLP anticipates the need for a licensed electrical contractor to repair & replace customer owned service entrance equipment in response to issues arising during meter exchanges related to AMI project
Job Location: Peabody

Information about Prevailing Wage Schedules for Awarding Authorities and Contractors

- This wage schedule applies only to the specific project referenced at the top of this page and uniquely identified by the "Wage Request Number" on all pages of this schedule.
- An Awarding Authority must request an updated wage schedule from the Department of Labor Standards ("DLS") if it has not opened bids or selected a contractor within 90 days of the date of issuance of the wage schedule. For CM AT RISK projects (bid pursuant to G.L. c.149A), the earlier of: (a) the execution date of the GMP Amendment, or (b) the bid for the first construction scope of work must be within 90-days of the wage schedule issuance date.
- The wage schedule shall be incorporated in any advertisement or call for bids for the project as required by M.G.L. c. 149, § 27. The wage schedule shall be made a part of the contract awarded for the project. The wage schedule must be posted in a conspicuous place at the work site for the life of the project in accordance with M.G.L. c. 149 § 27. The wages listed on the wage schedule must be paid to employees performing construction work on the project whether they are employed by the prime contractor, a filed sub-bidder, or any sub-contractor.
- All apprentices working on the project are required to be registered with the Massachusetts Department of Labor Standards, Division of Apprentice Standards (DLS/DAS). Apprentice must keep his/her apprentice identification card on his/her person during all work hours on the project. An apprentice registered with DAS may be paid the lower apprentice wage rate at the applicable step as provided on the prevailing wage schedule. **Any apprentice not registered with DLS/DAS regardless of whether or not they are registered with any other federal, state, local, or private agency must be paid the journeyworker's rate for the trade.**
- The wage rates will remain in effect for the duration of the project, except in the case of multi-year public construction projects. For construction projects lasting longer than one year, awarding authorities must request an updated wage schedule. Awarding authorities are required to request these updates no later than two weeks before the anniversary of the date the contract was executed by the awarding authority and the general contractor. For multi-year CM AT RISK projects, awarding authority must request an annual update no later than two weeks before the anniversary date, determined as the earlier of: (a) the execution date of the GMP Amendment, or (b) the execution date of the first amendment to permit procurement of construction services. Contractors are required to obtain the wage schedules from awarding authorities, and to pay no less than these rates to covered workers. The annual update requirement is not applicable to 27F "rental of equipment" contracts.
- Every contractor or subcontractor which performs construction work on the project is required to submit weekly payroll reports and a Statement of Compliance directly to the awarding authority by mail or email and keep them on file for three years. Each weekly payroll report must contain: the employee's name, address, occupational classification, hours worked, and wages paid. Do not submit weekly payroll reports to DLS. A sample of a payroll reporting form may be obtained at <http://www.mass.gov/dols/pw>.
- Contractors with questions about the wage rates or classifications included on the wage schedule have an affirmative obligation to inquire with DLS at (617) 626-6953.
- Employees not receiving the prevailing wage rate set forth on the wage schedule may report the violation to the Fair Labor Division of the office of the Attorney General at (617) 727-3465.
- Failure of a contractor or subcontractor to pay the prevailing wage rates listed on the wage schedule to all employees who perform construction work on the project is a violation of the law and subjects the contractor or subcontractor to civil and

Information about Prevailing Wage Schedules for Awarding Authorities and Contractors

- This wage schedule applies only to the specific project referenced at the top of this page and uniquely identified by the "Wage Request Number" on all pages of this schedule.
- An Awarding Authority must request an updated wage schedule from the Department of Labor Standards ("DLS") if it has not opened bids or selected a contractor within 90 days of the date of issuance of the wage schedule. For CM AT RISK projects (bid pursuant to G.L. c.149A), the earlier of: (a) the execution date of the GMP Amendment, or (b) the bid for the first construction scope of work must be within 90-days of the wage schedule issuance date.
- The wage schedule shall be incorporated in any advertisement or call for bids for the project as required by M.G.L. c. 149, § 27. The wage schedule shall be made a part of the contract awarded for the project. The wage schedule must be posted in a conspicuous place at the work site for the life of the project in accordance with M.G.L. c. 149 § 27. The wages listed on the wage schedule must be paid to employees performing construction work on the project whether they are employed by the prime contractor, a filed sub-bidder, or any sub-contractor.
- All apprentices working on the project are required to be registered with the Massachusetts Department of Labor Standards, Division of Apprentice Standards (DLS/DAS). Apprentice must keep his/her apprentice identification card on his/her person during all work hours on the project. An apprentice registered with DAS may be paid the lower apprentice wage rate at the applicable step as provided on the prevailing wage schedule. **Any apprentice not registered with DLS/DAS regardless of whether or not they are registered with any other federal, state, local, or private agency must be paid the journeyworker's rate for the trade.**
- The wage rates will remain in effect for the duration of the project, except in the case of multi-year public construction projects. For construction projects lasting longer than one year, awarding authorities must request an updated wage schedule. Awarding authorities are required to request these updates no later than two weeks before the anniversary of the date the contract was executed by the awarding authority and the general contractor. For multi-year CM AT RISK projects, awarding authority must request an annual update no later than two weeks before the anniversary date, determined as the earlier of: (a) the execution date of the GMP Amendment, or (b) the execution date of the first amendment to permit procurement of construction services. Contractors are required to obtain the wage schedules from awarding authorities, and to pay no less than these rates to covered workers. The annual update requirement is not applicable to 27F "rental of equipment" contracts.
- Every contractor or subcontractor which performs construction work on the project is required to submit weekly payroll reports and a Statement of Compliance directly to the awarding authority by mail or email and keep them on file for three years. Each weekly payroll report must contain: the employee's name, address, occupational classification, hours worked, and wages paid. Do not submit weekly payroll reports to DLS. A sample of a payroll reporting form may be obtained at <http://www.mass.gov/dols/pw>.
- Contractors with questions about the wage rates or classifications included on the wage schedule have an affirmative obligation to inquire with DLS at (617) 626-6953.
- Employees not receiving the prevailing wage rate set forth on the wage schedule may report the violation to the Fair Labor Division of the office of the Attorney General at (617) 727-3465.
- Failure of a contractor or subcontractor to pay the prevailing wage rates listed on the wage schedule to all employees who perform construction work on the project is a violation of the law and subjects the contractor or subcontractor to civil and
